

Company Profile

Base of 15 years of know how on manufacturing of SMT related machinery. SJ INNO TECH manufactures machinery of top quality that does not fall behind the imported expensive machinery including VISION SCREEN PRINTER and other equipment that are essential for SMT production line.

Our technology development team is doing our best to supply the machinery that is easy to use and has high productivity along with high accuracy. We are responding to the demands of the quickly changing industries by working to hard based on the technology to manufacture the latest semiconductor and know-how.

We will always be up-to-date and advance image-wise. We will recompense by endlessly challenging in our studies and technology development.

PCB Transport Conveyor Systems

PCB Loading System

PCB Unloading System

SMT Inspection System

Connecting Conveyor

Automatic Vision Screen Printer HP 520

APPLICATION PCB

PCB Size(mm)

Up to 520W X 420L

Stencil Size

736L X 736W (29" x 29")

TRANSFER SYSTEM

Conveyor Adjustment

Automatic (Standard)

Transfer Height

900+/- 30 mm

Transfer Base Position

Front Fixed (Standard)

UNDER SIDE STENCIL CLEANER

Operation

Dual Vacuum unit, wet, dry, vacuum & blow

On Board Paste Inspection

2D Inspection System
